

**Confirmation on Benefits of Using "MozziQuit" MQ-MAX  
Mosquito Trap Device**

As per letter ref. kahama/pasam/MozziQuit-MQ-MAX/2013-14/3679 dated 28/10/2013 from Karnataka Co-operative Milk Producers' Federation Ltd., Bangalore, M/s. Leowin Solutions Pvt. Ltd. of Kuloor, Mangalore 575013, had supplied to Assistant Director's, Veterinary Officers, and to Senior Veterinary Inspectors of Mangaluru Taluk, Department of Animal Husbandry and Veterinary Services, total 15 Nos. of their innovative "MozziQuit" MQ-MAX Mosquito Trap Device during November 2013 with a request to test "MozziQuit" MQ-MAX in Cow Sheds and houses of progressive farmers/cow owners at various locations and request them to provide evaluation report on the usefulness of the device.

Following have been reported by all the officials and all the cow owners/farmers who have used "MozziQuit" MQ-MAX for period between November 2013 till 31<sup>st</sup> January 2014 from various locations i.e. Kinnigoli, Surathkal, Mulky, Mangalore, Bolar, Kotekar, Bajpe, Belwai, Ganjimatta, Shirthadi, Vamanjur etc. in Mangalore Taluk:

1. "MozziQuit" MQ-MAX attract, trap and kill thousands of mosquitoes every day when used in Cow Shed. Dead mosquitoes are collected in removable collection container in the device and it is very useful in controlling mosquitoes multiplication.
2. Device is eco-friendly as there is no chemical or daily refill is required to use. Operating cost per day is minimum only for electricity of equivalent to Zero Volt Bulb.
3. By using "MozziQuit" MQ-MAX in cow sheds between 6.30 pm till 6.00 am, it is noticed that cows/animals get total relief from mosquito bites as a result get enough rest which enable them to have enough food and increase in milk yield.
4. "MozziQuit" MQ-MAX is also found effective in trapping and killing all mosquitoes found inside the houses when used between 6 pm till 6 am inside rooms in house.

This is to Certify and Confirm that "MozziQuit" MQ-MAX device of Leowin Solutions Pvt. Ltd. is very useful to trap and eliminate mosquitoes in cow sheds, dog cages and houses thereby to control mosquitoes population as it restricts mosquito multiplication in the place of its use.
